Katie

Here is a photo of the coral bed where I found
the specimen of the Subergorgia AT Fanning Atoll.
The photo was taken at about 850 ft.

Each of the trees in the photo is about 3 to 5 ft. tall.
I have some slides of ^{the} live gorgo close-up if you find
need for such.

I hope this photo is of some use to you.
I'll be going to Fanning AGAIN AT the end of this month,
I'll be there for about 4 months.

If you're in Cambridge, be sure to drop by.

Aldia

Phil

P.S. in a separate packet I'm sending you a
reprint of some herbivore stuff.
